*"This allows us to ensure that our clients globally receive the most efficient and cost effective systems that provide them with the most management flexibility."*

*Our FREE Aeration, Water Pumping, Water Filtration, Heating and Chilling Systems Design ensures our clients receive the best equipment based on their needs and requirements.*

In a continued effort to improve our product and service offerings to our clients, we now offer a wide range of services in addition to our FREE systems design that we have provided for over 37 years. Some of our new services include *Consulting Services, Submittal Services, Bid Specifying, Installation/Commissioning*, and much more. This allows us to ensure that our clients globally receive the most efficient and cost effective systems that provide them with the most management flexibility.

Our Consulting Services are available to assist with everything from Facility Layout to Systems Selection. Our qualified staff has expertise in every aspect of aquatic life support systems, wastewater treatment and much more.

We also assist with virtually every aspect of Public Bids from Selecting/Specifying Equipment, Submittal Services, O & M Manuals and more. Our expertise in equipment and systems designs allows engineering firms, contractors and equipment representatives to focus on other critical areas while having the piece of mind that the equipment for the aquatic life support systems are being completed.

Upon project completion, we also provide Training Services to ensure the entire operating and maintenance staff at the clients location understands complete systems operation and is able to troubleshoot potential problems. This allows us to ensure our clients receive the most effective equipment based on their needs with superior customer service.

Please contact any of our Technical Representatives for additional information on our services and/or to request our services for your project. You can also request a FREE copy of our Catalog and Applications Source Book which is the most detailed in the industry.

We look forward to having the opportunity to serve all of your system and equipment needs as we have had the pleasure of doing over the last 38 years.
