

'MODERN SPRAY' FOUNTAINS

Our **'Modern Spray' Fountains** are the most versatile and durable fountains developed. *'Modern Spray' Fountains* come in 9 different patterns with horsepowers up to 5 HP. Years of engineering design have gone into the development of the *'Modern Spray' Fountains* to provide for efficient and cost effective operation. Two methods have been employed to achieve the desired effect which include **Propeller Units** and **Pumps Units**.

The **Propeller Units** move a large volume of water through a converging nozzle, causing shearing to occur, breaking the water into micro droplets and exposing more water surface area to the atmosphere. As the water returns to the "parent body", each droplet drags an additional amount of water with it, causing an "induced flow" effect, which in essence increases the surface area of the lake. All of these factors result in an excellent aeration benefit.

The **Pump Units** feature a unique center discharge design allows for high pressure to develop, thus permitting terrific heights to be achieved at far less horsepower compared to competitive fountain equipment. The centrifugal pump unit spray patterns while aerating water, should only be used for aesthetics since the volume is not created as with a propeller pump unit. The best option is to use fountains in conjunction with diffused aeration to provide algae and odor control. The centrifugal pump allows cooling to occur by evaporation since a fine "mist" is developed due to the pump pressures created.

Some of the Advantages of fountains provide include:

- Stainless Steel Franklin Electric Submersible Motors (UL and CSA)
- Oil-Free Operation
- Energy Efficient Operation
- Interchangeable Nozzles
- No long Shafts To Bend Or Become Out Of Balance
- No Seals Or Bearings To Maintain
- High Speed, Foul Resistant Propeller Or Impeller
- No "Lazy" Spray Or Bubbles
- One Piece, Square Flotation For Stability
- Water Tight (Removable) 100' Power Cable Standard
- Ground Fault Circuit Interrupter (GFCI) On 1/2 HP Models
- Fountains(1 HP Thru 5 HP) Have ETL Listed (ANSI/UL508) Control Panel With Time Clock, GCFI (Single Phase Only) And Single Phase Or Three Phase Control

With all 'Modern Spray' Fountains - FREE sizing is available to ensure your fountains meets your needs. Please consult with a Technical Representative to select your 'Modern Spray' Fountain today!

POND/LAKE AERATION SYSTEMS (QR SERIES)

Our 'Modern Air' Aeration Systems have been the Industry Standard in sub-surface aeration systems for over 30 years! Our QR Series are designed for Ponds/Lakes from 1/2 Acre to 2 Acres - with modified systems able to aerate up to 8 Acres. Other systems are also available to aerate any size of lake and our 'Modern Air' Aerator is also available for any size of lake.

Each QR System will provide tremendous oxygen transfer and destratification (Oxygen and Temperature) providing for high quality water and will also eliminate algal blooms. Another benefit is that the same system can be used in the winter as a De-Icing System.

Each system comes complete with all components and peripherals required for operation. Some of the components included are QR Series Compressor, Diffuser Grid(s), Valving, Gauges, Tubing, Fittings, Connectors and more. Each system has been designed for ease of installation, operation and maintenance. Each component utilized in each 'Modern Air' Aeration System is manufactured from the highest quality products to provide for durability and minimal maintenance. In addition - our QR Series Systems are extremely quiet compared to other similar systems making them ideal for operation in areas where quiet operation is imperative.

FREE Systems Design is available for all systems - please consult with an AREA Technical Representative for assistance. Our design team will provide you with complete system drawings and proposal to allow you to make an informed decision. For product or engineering information call (305)248-4205 or FAX (305)248-1756.

MODEL NO.	SIZE OF POND/LAKE	DESCRIPTION	LIST PRICE
QR0030S-1/3	Up To 1/2 Acre	QR0030 System (1/3 HP, 1 Phase or 3 Phase, 1 Diffuser Grid, All Tubing, Peripherals /Components	\$687.22
QR0050S-1/3	1/2 Acre To 1 Acre	QR0050 System (1/3 HP, 1 Phase or 3 Phase, 2 Diffuser Grids, All Tubing, Peripherals /Components	794.65
QR0080S-1/3	1 Acre To 1-1/2 Acre	QR0080 System (3/4 HP, 1 Phase or 3 Phase, 3 Diffuser Grid, All Tubing, Peripherals /Components	1144.79
QR0100S-1/3	1-1/2 Acre To 2 Acre	QR0100 System (3/4 HP, 1 Phase or 3 Phase, 4 Diffuser Grid, All Tubing, Peripherals /Components	1243.97

• All Systems Available In 1 Phase or 3 Phase, 50 or 60 Hz - Please Advise When Ordering. • Please note that 100' of Black Polyethylene Tubing is allocated per grid. Additional tubing may be required. Self Ballasting Tubing Is Available - Inquire For Pricing. • Manifold Drawings And Assembly Instructions Are Available For All Four (4) QR Systems. Please contact an AREA Technical Representative to receive any of the drawings.

ORNAMENTAL SYSTEMS

MODEL 107

MODEL 908

MODEL 907

Our *Ornamental Systems* have been designed for the ornamental ponds found in homes, parks, residential communities, office parks and other similar water features. These systems provide a perfect alternative for small ponds (1/4 Acre and below) that do not require our QR Series Systems, 'Modern Spray' Fountains or 'Modern Air' Aerators.

Each Ornamental System will provide tremendous oxygen transfer and destratification to keep the pond clear and algae free. As with other systems - each system can also be used in the winter as a De-Icing System. Each system comes complete with all components and peripherals required for operation. Some of the components included are Compressor, Diffuser(s), Valving, Gauges, Tubing, Fittings, Connectors and more. Each system has been designed for ease of installation, operation and maintenance.

FREE Systems Design is available for all systems - please consult with an AREA Technical Representative for assistance. Our design team will provide you with complete system drawings and proposal to allow you to make an informed decision. For product or engineering information call (305)248-4205 or FAX (305)248-1756.

MODEL NO.	DESCRIPTION	LIST PRICE
OPS107-1	107 System (1/20 HP, 120 Volt, 2 - 3" 'Pro-Glass II Alumina Diffusers, All Tubing, Peripherals /Components	\$374.26
OPS908-1	908 System (1/8 HP, 120 Volt, 2 - 6" 'Pro-Glass II Alumina Diffusers, All Tubing, Peripherals /Components	479.52
OPS907-12V	907 System (1/10 HP, 12 Volt, 3 - 3" 'Pro-Glass II Alumina Diffusers, All Tubing, Peripherals /Components	381.76

• Systems Also Available In 230 Volt or 50 Hz - Consult With A Technical Representative. • Please note that 100' of Black Polyethylene Tubing Is Allocated Per System. Additional Tubing May Be Required. Self Ballasting Tubing Is Available - Inquire For Pricing.

Our **'Pro-Glass' II Fused Alumina Diffusers** were developed by AREA and have been the Industry Standard for over 30 years. Our **'Pro-Glass' Fused Alumina Diffusers** are manufactured by heat fusion at 2000+°F - thus there

are no bonding agents that will break down when cleaning with acid or chlorine. Each diffuser has been engineered to provide minimal air flow resistance making them ideal for ornamental ponds, water features and aquatic displays. Due to their design and construction, our diffusers resist fouling and clogging thus making them ideal for both indoor and outdoor use. Should cleaning be necessitated due to fouling by bacteria and/or algae, use Chlorine for cleaning and if fouling results from carbonate deposits, use Muriatic (HCl) Acid.

MODEL NO.	DIMENSIONS.	FITTING SIZE	PRICE
GFS526-1.0	1" x 1" x 2"	3/16" Hose Barb	\$3.83

- Hose fittings on stock units are polyethylene

DISC DIFFUSERS

If you demand the highest level of membrane diffuser performance, our **'Pro-Flex' Disc Diffusers** will insure that those demands are met. Features of our **'Pro-Flex' Disc Diffusers** include *Uniform Bubble Distribution, Built In Check Valve, Heavy Duty Membrane and Corrosion Resistant Base.*

SIZE (IN.)	PART NO.	UNIT PRICE
3/4" Thd	563-3409	\$18.81

TUBULAR DIFFUSERS

The advantages of our **'Pro-Flex' Tubular Diffuser** over the standard coarse bubble diffusers are *Increased Oxygen Transfer, Greater Area Of Influence, Self Ballasting and Heavy Duty Membrane.*

LENGTH (IN.)	PART NO.	UNIT PRICE
24	563-3424	\$45.15
39	563-3439	69.62

CAP DIFFUSERS

Our **'Pro-Flex' Cap Diffusers** consists of two parts, a Celcon molded base and a EPDM-based rubber check diaphragm. The way this diffuser works is when air is applied the diaphragm lifts off of the base allowing air to exit through the orifices in the diaphragm. When the air is shut off the diaphragm immediately seals against the base preventing backflow. The innovative design of the base locks the diaphragm preventing blowoff in the event of a pressure surge.

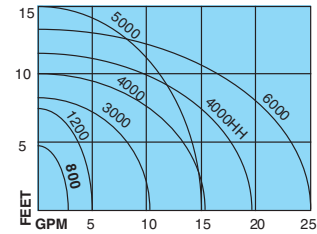

SIZE (IN.)	PART NO.	UNIT PRICE
3/8" Thrd	563-375	\$10.35
3/4" Thrd	563-750	10.35

QUIET WATER PUMPS

Our **Quiet One Water Pumps** are the quiet pumps perfect for aquariums, ponds or research systems! The best feature of all is they can be used in either *Above Water* or *Submersible* applications. Our patented uni directional impeller and ceramic bearing provides long life. All models are 115V/60 Hz, but 230V/50 Hz models are available, simply call on an **AREA Technical Representative** for pricing and information. Some of the amazing features include **Quiet Operation, Energy Efficient, External or Submersible, Small Footprint, High Flow Rate,** and a **1 Year Warranty.**

QUIET FILTER/PUMP SYSTEM

PUMP/FILTER KIT

Our **Quiet Filter/Pump Kit** is perfect for any ornamental pond, water feature or aquatic display. We offer 3 Models from 1,000 Gallons to 2,500 Gallons. Each system comes complete with Quiet Water Pump, Submersible Pond Filter and System Connections. Each system will provide tremendous filtration with minimal maintenance and each system is designed to be extremely durable. All systems come with our 1 Year Warranty! For sizing assistance - please consult with an AREA Technical Representative.

MODEL	DESCRIPTION	PRICE
541-QFS21	1000 Gal. Pump/Filter Kit, 115 Volt	\$155.74
541-QFS22	1700 Gal. Pump/Filter Kit, 115 Volt	174.28
541-QFS23	2500 Gal. Pump/Filter Kit, 115 Volt	239.81

WATERFALL PUMP

Our **Waterfall Pump** is custom designed for the specific demands of waterfalls and other water features. Our diffuser and impeller combination is engineered to deliver quiet operation in high flow applications. Contact an **AREA Technical Representative** for sizing to ensure you receive the perfect pump for your water feature.

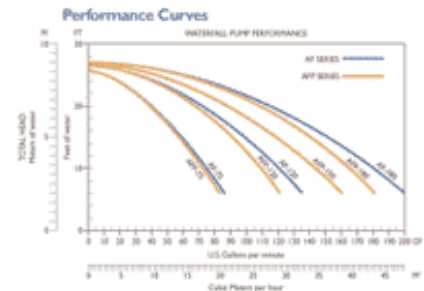

Some of the superior features of our **WhisperFlow Water Pumps** include

- **Costs Less To Operate (Energy Efficient Motors)**
- **Quiet Operation**
- **Oversized Strainer Basket**
- **See Thru Lid On Basket Strainer**
- **High Efficiency Impeller and FunnelFlo Diffuser**
- **Available In 1 Speed and 2 Speed**
- **1 Year Warranty**

MODEL	DESCRIPTION	PRICE
541-AFP75	75 gpm, 115/230 Volt, 8/4 Amps	\$630.21
541-AFP120	120 gpm, 115/230 Volt, 8/4 Amps	692.17
541-AFP150	150 gpm, 115/230 Volt, 14/7 Amps	813.97
541-AFP180	180 gpm, 115/230 Volt, 14/7 Amps	1093.59

* Pump Includes Strainer Basket * All Pumps Have 2" In/Out, Except 180 gpm Model Has 3" In / 2" Out

'CRYSTAL CLEAR' FILTER PACKAGES (LOW FLOW)

Our **'Crystal-Clear' Filter Packages** are the solution to any standard filtering need for ornamental ponds, water feature or aquatic display. Each package is assembled on a strong platform and shipped ready for installation. Some of the amazing features of our filter packages include a compact footprint (for space limited locations) and all plumbing connections required for installation and operation.

Our **'Crystal-Clear' Filter Packages** operate independently requiring little maintenance and quickly solving suspended solid waste as well as nuisance algae problems without the need of harmful chemicals. For larger systems or systems with Sterilization - see our larger **'Crystal Clear' Filter Packages**.

MODEL	DESCRIPTION	GPM	SYSTEM OVERVIEW	WEIGHT (lbs)	PRICE
541-PFS40	19"Ø Filter/Top Mnt Filter/Pump	40	Sand Media, 3/4 HP Pump	175	\$816.32
541-PFS50	21"Ø Filter/Top Mnt/Pump	50	Sand Media, 1 HP Pump	177	868.36

'CRYSTAL CLEAR' FILTER PACKAGES (HIGH FLOW)

Our **'Pro-Clear' Filter Packages** are the solution to any filtering and disinfecting need. They are perfect for *Large Ornamental Ponds, Waterfalls, Water Features and Aquatic Displays*. Our systems combine efficient *Solids Filtering with UV Sterilization*. Each package is assembled on a strong platform and shipped ready for installation. Some of the amazing features of our filter packages include a compact footprint (for space limited locations) and a centralized power control enclosure.

Our **'Pro-Clear' Filter Packages** operate independently requiring little maintenance from grounds and husbandry personnel, quickly solving suspended solid waste as well as nuisance algae problems without the need of harmful chemicals. We can also **customize** your own **'Pro-Clear' Filter Packages** with features such as an *Ozone Generator, UV Touch Screen Controller* and more.

Some of the features of our **'Pro-Clear' Filter Packages** include:

- Optimum Solid Waste Separation, Designed For Heavy Solids Applications Such As *Mammal Bathing Pools, Fish Ponds, and Wastewater Treatment*
- Effective "High Output" UV Sterilization
- Independent, Dependable Operation
- Centralized Power Control NEMA 4X Enclosure
- Plumbed And Shipped **Ready For Installation**

POLYPROPYLENE FILTER BAGS/SUPPORT DISCS

Our **Polypropylene Filter Bags** are the highest quality filter bags and perfect for filtering pond water or water features. All filter material used is manufactured under strict quality control to make them the most dependable, and cost effective while maintaining consistency in quality. Our

Polypropylene Filter Bags and Discs are constructed of polypropylene which is resistant to Muriatic (HCl) Acid.

POND MAINTENANCE PRODUCTS

We offer a complete line of Pond Maintenance Products including Pond Brush, Hand Skimmer, Telescopic Pole, PVC Handle, Long Handle Skimmer and our Mini Vac. All of our maintenance equipment has been designed with the pond owner in mind to allow for Maintenance to be quick and easy. All products are manufactured to the highest quality products and are designed for durability.

Our Hand Skimmer and Long Handle Skimmer come equipped with Magnet and are perfect for removing floating debris, leaves, etc.. When using our Mini Vac - it is designed for use with garden hose or 1-1/4" or 1-1/2" vacuum hose. The Mini Vac comes complete with collector bag and hose adapter. We offer Replacement Parts for all products - contact a Sales Representative for assistance.

For assistance in selecting the perfect maintenance product for you, please contact one of our *Technical Representative* for assistance.

HAND SKIMMER

LONG HANDLE SKIMMER

POND MINI VAC

POND BRUSH

TELESCOPIC POLE

MODEL	DESCRIPTION	PRICE
541-PB0080	Pond Brush (18" Polished Metal Black, UV Stabilized, Fits Standard Poles)	\$10.00
541-HS1166	Hand Skimmer (Polyester Screen Molded Into Polypro Frame w/ Magnet)	7.26
541-LHS1186	Long Handle Skimmer (Hand Skimmer Attached To 1" x 4' Alum. Pole, w/ Magnet)	11.82
541-TLP0074	Telescopic Pole-2 Piece (Extends To 8', Aluminum Tubing)	15.77
541-PVH1126	PVC Handle (1-1/4" x 4' With Pole Cap)	12.32

POND LIGHT KITS

FLOATING SOLAR LIGHTS

We offer two (2) Light Kit options which include our **Floating Multi-Color Solar Lights** and our **Automated Light Kit**. Each *Light Kit* is designed for the ornamental pond owner and is manufactured for durability, and aesthetic beauty. Our *Floating Solar Lights* are 4"Ø LED lights with Self-Changing - Multi Color feature to float in your pond, fountain or pool. They can also be hung in your garden. Each Light is water safe and requires no wiring. The sunlight charges the lights battery during the day and the light turns on at night. Each unit is equipped with an On/Off Switch.

Our **Automated Light Kits** are designed for small ponds, water gardens and water features. Each Light Kit is automated and color changing that produces a palette of colorful underwater illumination that transforms any body of water into a spectacular visual sensation. Each light features bright white halogen quartz lamps mounted behind a computer controlled revolving color wheel which produces spectacular effects. Each quartz bulb is long life and energy efficient. Each light kit is controlled by a single switch and features impact resistant lens along with a specially designed support base and lens guard for secure placement inside of any ponds or water garden.

For assistance with sizing of the best lighting system for you - please consult with an *AREA Technical Representative* for assistance.

AUTOMATED LIGHT KIT

MODEL	DESCRIPTION	PRICE
541-SLK0380	Floating Multi Color Solar Lights, 4"Ø	\$27.78
541-ALK0001	Automatic Light Kit (115 Volt, 50' Cord)	636.96
541-ALK0012	Automatic Light Kit (12 Volt, 50' Cord) (Separate Transformer Required)	606.20
541-ALK0001	Small (Auto Light) Base/Guard Kit	239.06

POND TEST STRIPS

Our complete line of Test Strips can be used to test Fresh or Saltwater Aquariums or Garden Pond Water. Each vial features leaf-proof, hinged pop-top lid and a wrap around desiccant liner to protect strips. Our Pond Test Strips allow you to test for Alkalinity, Ammonia, pH, Nitrite, Nitrate and Hardness.

For assistance with sizing of the best lighting system for you - please consult with an *AREA Technical Representative* for assistance.
